Malang, East Java, Indonesia

Full-Stack Web Developer & AI Chatbot Developer.

Work Experience

PLN Institute of Technology - Freelance - Remote

Mar 2026 - Jun 2026

Project Manager

A university in Jakarta that focuses on energy, environmentally friendly technology, and electrical engineering, operating under the auspices of the PLN Education and Welfare Foundation.

- Led the development of a RAG-based AI chatbot for PLN's UPDL unit to improve the efficiency of employee access to training data.
- Managed the team's workflow from the planning stage through data integration to system testing to ensure the platform operated in accordance with operational standards.
- Facilitated communication between technical developers and stakeholders to align platform feature requirements.
- Compiling project documentation and technical guidelines to facilitate future system maintenance.

Malang State University - Freelance - Malang

Oct 2025 - Dec 2025

Full stack & AI Chatbot Developer

The Electrical Engineering program at Malang State University is part of the Department of Electrical Engineering and Computer Science in the Faculty of Engineering at UM.

- Developed a Retrieval-Augmented Generation (RAG)-based AI chatbot system using Python to provide information about the graduate programs in the Department of Electrical Engineering & Computer Science.
- Processed academic databases and internal documents so that the chatbot could automatically provide precise and relevant answers.
- Implemented vector embedding and document processing techniques to improve data retrieval accuracy.
- Testing and evaluating AI responses to minimize the risk of hallucination in the system's answers.

Al Asror Integrated Islamic Elementary School - Intern - Yogyakarta

Jul 2025 - Dec 2025

Full stack developer

A integrated Islamic elementary school located in Suru Lor Hamlet, Hargomulyo Village, Gedangsari Subdistrict, Gunungkidul Regency, Yogyakarta.

- Designed and developed the organization's website profile and donation management features using PHP, Laravel, and the Filament Framework.
- Built a user-friendly admin panel to help schools manage donation tracking and reporting in real time.
- Implementing a MySQL database schema to ensure donation transactions are recorded in a structured and secure manner.
- Integrating a responsive front-end interface to ensure easy access via both mobile and desktop devices.

Education Level

State Polytechnic of Malang - Malang

Aug 2022 - Jul 2026

Bachelor of Applied Science in Computer Science, 3.59/4.00
